

## Four Options To Choose From

**Gate Size: Suits up to 13ft gate (4m)**  
**Max gate weight 80kg**

## PRODUCT DESCRIPTION

- The D.I.Y kits provide a simple sliding gate solution for rural properties. Using the engineered cantilever system you don't have to worry about the condition of the driveway as ground track is not used. We even have automated kits available.
- With a simple concrete foundation the gate can be used over crushed rock, sloping, heavily pitted and even extremely muddy openings: The sturdy and robust design is pre-galvanised and aesthetically improves the look of any farm gate.
- Take the kit away and install it in a day!

## POPULAR OPTIONS (OTHER OPTIONS ARE AVAILABLE)

- 1 x motor mount bracket
- 1 x 24VDC Italian Made Gate Motor, with receiver and two remotes
- 5 x 1m lengths of Nylon gear rack
- Solar Kit; 1 x 50W - 24V Solar Panel with adj. mount, 2 x 9AmpAH batteries, 1 x solar control box. No accessories can be attached to this solar kit

Cantilever sliding gates are the perfect solution for rural applications as there is no need to run ground track across the opening.

Cantilever gates run parallel to the fenceline, they eliminate the arc that swing gates have, leaving a nice open space.
