

MOTORISED LOCKING BOLT

★★★★★
PREMIUM QUALITY

MADE IN AUSTRIA

Easy to use
Euro-Key
manual
release

3
YEAR
WARRANTY

Austrian made Heavy Duty electric, worm-driven lock, with 125mm stroke and Ø23mm bolt.

ADVANTAGES AT A GLANCE:

- Powder-coated aluminum housing
- Euro-key manual release (including 3 keys)
- Limit switch for "bolt retracted"
- Automatic obstacle reversing
- Suitable for vertical + Horizontal installation
- Includes 1m 4-pin cable
- Bolt lifting Force; 200N
- Speeds; 2.5 second drop, 2 second retraction

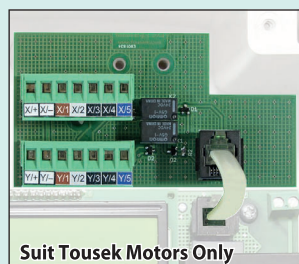

DIMENSIONS:

- (Housing) 561mm L x 60mm W x 68mm D

IMPORTANT NOTES:

- Ensure you select the correct kit. If the lock is to be used with a Tousek Motor, then a Tousek Control Module will be needed to interface between the motor control board, and the lock. For all other motors, the Tousek Control Module will not be needed.

MODELS	MOTOR POWER SUPPLY	BOLT STROKE LENGTH	LIFTING FORCE	DROP SPEED	RETRACTION SPEED	SINGLE KIT PART NO.	DOUBLE KIT PART NO.
SUIT TOUSEK MOTORS (Inc. Control Module)	12V	125mm	200N	2.5sec	2sec	1045-0028	1045-0029
SUIT OTHER MOTORS	12V	125mm	200N	2.5sec	2sec	1045-0030	1045-0031

Suit Tousek Motors Only

The drop-bolt control module is compatible with the following Tousek (only) operator control boards:

ST51, ST61 and ST REX

Control Board Interface

For Single Lock

For Dual Locks

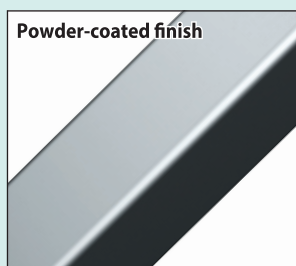

There are Controllers for a single lock, and one for dual locks.

Each locking unit has it's own control board, and separate transformer (power supply), which increases the reliability and smooth operation of the lock.

Safelock Controller for Single or Double Locks

Euro-key manual release

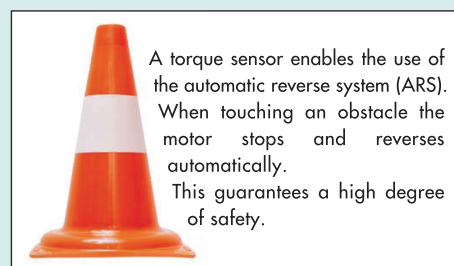

Powder-coated finish

Aluminium housing

125mm bolt stroke

ARS (Automatic Reverse System)

A torque sensor enables the use of the automatic reverse system (ARS). When touching an obstacle the motor stops and reverses automatically. This guarantees a high degree of safety.
