

Slim CLR

12V Residential Swing Gate operator

Made in AUSTRIA

Suited to residential use

12V technology, energy saving DC motor with low vibration

Standard soft stop; operator stops at both ends with a reduced speed

Uses bolt on brackets; no welding required, making for easy installation

Intelligent control unit, mounted in separate enclosure

Automatic Reversal System triggers gate reversal when obstructed

Excellent for solar applications (45 mA current draw)

LC-Display is conveniently visible through the control unit housing

Discreet, modern design using high-quality materials
