

Part: 1018-0140

IMPORTANT NOTES

- Gate logic needs to be set to auto-close
- Use of safety beams strongly recommended

Wireless free exit system, can be partly buried or mounted to an object such as a post making for easy installation

The Puck is powered by two CR123A - 6V Batteries housed in a fully sealed casing offering 1-3 years of battery life*

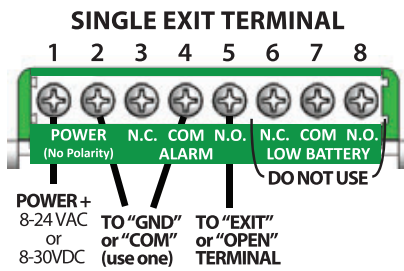

Works with all operators, simply connect the 'wireless receiver' to your control board

The Puck offers three sensitivity levels; HIGH, MEDIUM and LOW when mounting the Puck in the middle of a driveway

No trenching required, the Wireless Puck can be mounted to an object or submerged just below the surface

TECHNICAL DATA

Power Supply	2 x CR123A Batteries (6V)
Standby Current	22 microamps
Alarm Current	130 milliamps
*Estimated Battery Life	1-3 Years
Use Frequency	Max. 350 cycles/day
IP	IP68

Standard Application Example
