

After more than 10 years of service, the IXIO range will undergo an upgrade. With our **Artek inside** technology, the IXIO will benefit as below:

ARTEK INSIDE

Item	IXIO	IXIO Artek
Radar Module Use different radar modules, but keep the same adjustable angle in both the vertical and horizontal directions.		
Radar Field Shape	Physical alteration is required to switch between a 6-element or 3-element antenna to achieve different shape field	Full digital adjustment. Can be switched by remote control and knob.
Radar Signal		Improved protection level. automatic recalibration of the radar signal for emergency exit doors in challenging environments, with a focus on airlocks.
Cross-Traffic Rejection	N/A	Optimization of cross-traffic rejection with the following recommended settings: narrow field shape, field size and immunity set to value 7
Cover	Current IXIO DT-1 and new IXIO Artek covers are NOT interchangeable.	Easier unclipping of the cover. Removable prisms for cleaning purposes. 
IR-Curtain Positioning		Optimised spring performance for precise IR-curtain positioning.
Wiring Color Code	Consistent with updated BEA cable design.	
CE and TUV Certification	Unchanged.	
Installation	No change to the positioning of screws, enhancing convenience for future replacement.	
Accessories	Bracket, ceiling accessories are compatible.
